DETAILED ACTION

Receipt is acknowledged of the information disclosure statement filed

10/15/2003. Preliminary amendments were filed on 10/15/2003 and 08/17/2004.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 16–32 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14 of U.S. Patent No. 6,660,279 (US'279). Although the conflicting claims are not identical, they are not patentably distinct from each other because US'279 claims a method of administering an aqueous solution of a low molecular weight peptide based thrombin inhibitor or a salt thereof used in the treatment of a thrombin-related condition, the inhibitor sealed in a primary package which uses bromobutyl rubber as a seal. Therefore, those of ordinary skill would expect the instant inhibition of thrombin given that the instant claims administer the same peptide-based thrombin inhibitors, by the same routes, and for the

Art Unit: 1615

same art recognized therapeutic purpose. There are no unusual and/or unexpected results which would rebut prima facie obviousness. As such, the instant method of inhibiting thrombin would have been obvious given the claims of US'279.

WO9601275 is cited as a patent of interest in its disclosure of thrombin inhibitors.
